Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878

# **SAFETY DATA SHEET**

TEKNOCRYL 1150-01 - TS 0700 ALUMINIUM

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

## 1.1 Product identifier

Product name : FEKNOCRYL 1150-01 - TS 0700 ALUMINIUM

**1.2 Relevant identified uses of the substance or mixture and uses advised against Product use** : **P**aint.

#### 1.3 Details of the supplier of the safety data sheet

Feknos Group Oy, Takkatie 3, FI-00370 HELSINKI, FINLAND. Tel. +358 9 506 091.
 e-mail address of person : Frod-safe@teknos.com

responsible for this SDS

#### **National contact**

Peknos Group Oy, Takkatie 3, FI-00370 HELSINKI, FINLAND. Tel. +358 9 506 091.

#### 1.4 Emergency telephone number

#### National advisory body/Poison Centre

Telephone number

: In an emergency, call 112

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Mam. Liq. 2, H225 Skin Irrit. 2, H315 Eye Irrit. 2, H319 STOT SE 3, H336 STOT RE 1, H372 Aquatic Chronic 3, H412

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

: Danger

See Section 11 for more detailed information on health effects and symptoms.

## 2.2 Label elements

Hazard pictograms

Signal word Hazard statements

- . **F**225 Highly flammable liquid and vapour.
  - H315 Causes skin irritation.
  - H319 Causes serious eye irritation.
  - H336 May cause drowsiness or dizziness.
  - H372 Causes damage to organs through prolonged or repeated exposure.
  - H412 Harmful to aquatic life with long lasting effects.

#### **Precautionary statements**

Date of previous issue

## **SECTION 2: Hazards identification**

| Prevention  | <ul> <li>280 - Wear protective gloves. Wear eye or face protection.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignitior sources. No smoking.</li> <li>P260 - Do not breathe vapour.</li> </ul> | ۱ |
|---|--|---|
| Response  | ₱314 - Get medical advice/attention if you feel unwell.  |   |
| Storage   | ₱403 + ₽233 - Store in a well-ventilated place. Keep container tightly closed.   |   |
| Disposal  | ₱501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.   |   |
| Hazardous ingredients   | ✓Methoxy 2-propanol<br>Naphtha (petroleum), hydrodesulfurized heavy  |   |
| Supplemental label<br>elements  |  |   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles |  |   |
| 2.3 Other hazards   |  |   |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | ✓ his mixture does not contain any substances that are assessed to be a PBT or a vPvB.   | í |
| Other hazards which do  | None known.  |   |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section. <u>Type</u>

Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

| 4.1 | Description | of first aid | measures |
|-----|-------------|--------------|----------|
|     |             |              |          |

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.   |
|--------------|---|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If it is suspected that fumes are still present, the rescuer should wear an appropriate<br>mask or self-contained breathing apparatus. If not breathing, if breathing is irregular<br>or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. It may be dangerous to the person providing aid to give mouth-to-mouth<br>resuscitation. Get medical attention. If necessary, call a poison center or physician.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |
| Skin contact | : Fush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion    | : Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.                           |

| Protection of first-aiders                     | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person   |
|--|--|
|  | providing aid to give mouth-to-mouth resuscitation.  |
|  | ns and effects, both acute and delayed   |
| Over-exposure signs/symp                       |  |
| Eye contact                                    | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation                                     | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness  |
| Skin contact                                   | : Adverse symptoms may include the following:<br>irritation<br>redness   |
| Ingestion                                      | : No specific data.  |
| 4.3 Indication of any immed                    | ate medical attention and special treatment needed   |
| Notes to physician                             | : Freat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.  |
| Specific treatments                            | : No specific treatment.   |
| SECTION 5: Firefigh                            | ting measures  |
| 5.1 Extinguishing media                        |  |
| Suitable extinguishing media                   | : <mark>I</mark> ∕se dry chemical, <sub>CO₂,</sub> water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.  |
| 5.2 Special hazards arising                    | from the substance or mixture  |
| Hazards from the substance or mixture          | : Highly flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is harmful to aquatic lif with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion<br>products               | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides   |
| 5.3 Advice for firefighters                    |  |
| Special protective actions for fire-fighters   | Fromptly isolate the scene by removing all persons from the vicinity of the incident in there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective equipment for fire-fighters | : Fre-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for   |

**is issue** : 30/07/2018

## **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro   | ctive equipment and emergency procedures  |
|---------------------------------|---|
| For non-emergency<br>personnel  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.  |
| For emergency responders        |   |
| 6.2 Environmental precautions   | Noid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmenta<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities.   |
| 6.3 Methods and material for    | ontainment and cleaning up  |
| Small spill                     | Stop leak if without risk. Move containers from spill area. Use spark-proof tools an explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | Stop leak if without risk. Move containers from spill area. Use spark-proof tools an explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.   |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures :                   | Fut on appropriate personal protective equipment (see Section 8). Do not breathe vapour or mist. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|---|--|
| Advice on general soccupational hygiene | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

#### 7.2 Conditions for safe storage, including any incompatibilities

Date of previous issue

## **SECTION 7: Handling and storage**

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

#### **Seveso Directive - Reporting thresholds**

| Danger criteria |                                 |                         |
|-----------------|---------------------------------|-------------------------|
| Category        | Notification and MAPP threshold | Safety report threshold |
| ₽5c             | 5000 tonne                      | 50000 tonne             |

#### 7.3 Specific end use(s)

**Recommendations** : Not available.

: Not available. Industrial sector specific solutions

### SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient                     | name Exposure limit values  |
|--|---|
| ✓Methoxy 2-propanol                    | EU OEL (Europe, 10/2019). Absorbed through skin. Notes: list<br>of indicative occupational exposure limit values<br>TWA: 100 ppm 8 hours.<br>TWA: 375 mg/m <sup>3</sup> 8 hours.<br>STEL: 150 ppm 15 minutes.   |
| Xylene                                 | STEL: 568 mg/m <sup>3</sup> 15 minutes.<br>EU OEL (Europe, 10/2019). [xylene, mixed isomers] Absorbed<br>through skin. Notes: list of indicative occupational exposure  |
|  | limit values<br>TWA: 50 ppm 8 hours.<br>TWA: 221 mg/m <sup>3</sup> 8 hours.<br>STEL: 100 ppm 15 minutes.<br>STEL: 442 mg/m <sup>3</sup> 15 minutes.   |
| Butanone                               | EU OEL (Europe, 10/2019). Notes: list of indicative occupational exposure limit values  |
|  | TWA: 200 ppm 8 hours.<br>TWA: 600 mg/m <sup>3</sup> 8 hours.<br>STEL: 300 ppm 15 minutes.<br>STEL: 900 mg/m <sup>3</sup> 15 minutes.  |
| Ethylbenzene                           | EU OEL (Europe, 10/2019). Absorbed through skin. Notes: list<br>of indicative occupational exposure limit values<br>TWA: 100 ppm 8 hours.<br>TWA: 442 mg/m <sup>3</sup> 8 hours.<br>STEL: 200 ppm 15 minutes.<br>STEL: 884 mg/m <sup>3</sup> 15 minutes.  |
| Recommended monitoring :<br>procedures | If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effectiveness<br>of the ventilation or other control measures and/or the necessity to use respiratory<br>protective equipment. Reference should be made to monitoring standards, such as<br>the following: European Standard EN 689 (Workplace atmospheres - Guidance for<br>the assessment of exposure by inhalation to chemical agents for comparison with<br>limit values and measurement strategy) European Standard EN 14042 (Workplace<br>atmospheres - Guide for the application and use of procedures for the assessment<br>of exposure to chemical and biological agents) European Standard EN 482<br>(Workplace atmospheres - General requirements for the performance of procedures |
| ate of issue/Date of revision          | : 15/11/2022 Date of previous issue : 30/07/2018 Version : 1.06 6/18  |

## **SECTION 8: Exposure controls/personal protection**

for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

| Product/ingredient name                         | Туре | Exposure                 | Value                        | Population            | Effects  |
|---|------|--------------------------|------------------------------|-----------------------|----------|
| Methoxy 2-propanol                              | DNEL | Long term Oral           | 33 mg/kg<br>bw/day           | General population    | Systemic |
|   | DNEL | Long term<br>Inhalation  | 43.9 mg/m <sup>3</sup>       | General population    | Systemic |
|   | DNEL | Long term Dermal         | 78 mg/kg<br>bw/day           | General<br>population | Systemic |
|   | DNEL | Long term Dermal         | 183 mg/kg<br>bw/day          | Workers               | Systemic |
|   | DNEL | Long term<br>Inhalation  | 369 mg/m <sup>3</sup>        | Workers               | Systemic |

#### **PNECs**

No PNECs available

8.2 Exposure controls Appropriate engineering controls

: Vese only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

#### **Individual protection measures**

: 30/07/2018

## **SECTION 8: Exposure controls/personal protection**

| Hygiene measures                | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.   |
|---------------------------------|---|
| Eye/face protection             | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                 |   |
| Hand protection                 | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|                                 | Recommendations :Wear suitable gloves tested to EN374.  |
|                                 | < 1 hour (breakthrough time): Mitrile gloves. thickness > 0.3 mm  |
|                                 | 1 - 4 hours (breakthrough time): polyvinyl alcohol (PVA) thickness > 0.3 mm or<br>4H / Silver Shield® gloves.   |
|                                 | > 8 hours (breakthrough time): $\sqrt[6]{1}$ ton $\mathbbm{R}$ thickness > 0.3 mm gloves  |
|                                 | $\overline{oldsymbol{\mathcal{W}}}$ ash hands before breaks and immediately after handling the product.   |
| Body protection                 | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. Refer to<br>European Standard EN 1149 for further information on material and design<br>requirements and test methods.  |
| Other skin protection           | : Repropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |
|                                 | Filter type:  |
|                                 | Filter type (spray application): 🛛 📈 P  |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>            |                     |

Conclusion/Summary

: Harmful to aquatic life with long lasting effects.

#### 12.2 Persistence and degradability

**Conclusion/Summary** : This product has not been tested for biodegradation.

#### 12.3 Bioaccumulative potential

| Product/ingredient name      | LogPow | BCF         | Potential |
|------------------------------|--------|-------------|-----------|
| Methoxy 2-propanol           | <1     | -           | low       |
| Naphtha (petroleum),         | -      | 10 to 2500  | high      |
| hydrodesulfurized heavy      |        |             | -         |
| Xylene                       | 3.12   | 8.1 to 25.9 | low       |
| Solvent naphtha (petroleum), | -      | 10 to 2500  | high      |
| light aromatic               |        |             | -         |
| 3-Butoxypropan-2-ol          | 1.2    | -           | low       |
| Butanone                     | 0.3    | -           | low       |
| Ethylbenzene                 | 3.6    | -           | low       |

#### 12.4 Mobility in soil

| Soil/water partition coefficient (Koc) | : Not available. |
|--|------------------|
| Mobility                               | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

Not available.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

| -                                 |   |
|-----------------------------------|---|
| 13.1 Waste treatment meth         | ods   |
| Product                           |   |
| Methods of disposal               | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. |
| Hazardous waste                   | : $\mathbb{F}$ he classification of the product may meet the criteria for a hazardous waste.  |
| European waste<br>catalogue (EWC) | : 🛛 80111*  |
| Packaging                         |   |
| Methods of disposal               | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |
| Special precautions               | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.         |

## **SECTION 14: Transport information**

user

14.6 Special precautions for : Fransport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Maritime transport in bulk according to IMO instruments

: Not relevant/applicable due to nature of the product.

## SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorisation

÷

#### **Annex XIV**

None of the components are listed.

#### Substances of very high concern

None of the components are listed.

**Annex XVII - Restrictions** on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

#### Other EU regulations

: Visted **Industrial emissions** (integrated pollution prevention and control) -Air : Visted Industrial emissions (integrated pollution prevention and control) -Water

Ozone depleting substances (1005/2009/EU)

Not listed.

Prior Informed Consent (PIC) (649/2012/EU)

Not listed.

**Persistent Organic Pollutants** Not listed.

#### **Seveso Directive**

This product is controlled under the Seveso Directive.

**Danger criteria** 

Category

P<sub>5</sub>c

**National regulations** 

International regulations

**Chemical Weapon Convention List Schedules I, II & III Chemicals** 

Not listed.

**Montreal Protocol** 

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.
